Calgary, AB

I am an enthusiastic Junior Software developer looking to improve my abilities. My education at SAIT has provided me a good working knowledge of basic programming languages, as well as experience in learning languages quickly and develop applications in a team environment. Prior to my training at SAIT I worked in multiple retail and warehouse positions that provided me the opportunity to work with a diverse group of people. I look forward to exploring opportunities in software development..

EXPERIENCES

Student SAIT | 2019 – 2020

The program was accelerated and the timelines were tight on understanding concepts and completing project work. I worked with a diverse group of team members and was acknowledged as being a fast learner and able to work independently with minimal direction. When working in the team environment I was adaptable and willing to take on all aspects of the project, including communicating project concepts, trouble shooting and GIT repository management. I further enhanced my organizational and time management skills during this program.

Warehouse Associate Cloverdale Paint | 2016 - 2019

This position was with an international organization. Throughout my career with the company, I had a variety of positions, which included picking orders for both British Columbia and the US branches and later receiving products. I was proficient in operating the TELZON gun for inventory control as well as company specific software and familiar with modern warehousing practices and methods. I gained good organizational and time management skills.

PROJECTS

Personal Website Individual Project

A personal website developed using HTML, CSS and JavaScript to help showcase my abilities and future projects, as well as creating a mobile platform which allows people to contact me.

SKILLS

- Technical**
- JavaScript
 - HTML5/CSS/Bootstrap
 - Node.js/ASP.NET
 - SQL/MySQL
